

Royal London Global Equity Diversified Fund

I Inc AUD

31 May 2026

Fund objective

The Fund's investment objective is to achieve capital growth over the long term, which should be considered as a period of 7-plus years. The Fund's performance target is to outperform, after the deduction of charges, the MSCI All Countries World Net Total Return Index AUD (the "Benchmark") by 0.4 - 0.8% per annum over rolling three year periods. The Index is considered an appropriate benchmark for the Fund's performance, as the Fund's potential investments will predominantly be included in the Index.

Cumulative performance %

	Cumulative performance %					Annualised %	
	1M	3M	6M	1Y	SI	1Y	SI
Share class	5.54	7.40	-	-	3.40	-	-
Benchmark	5.08	6.51	-	-	3.94	-	-

Past performance is not a guarantee or reliable indicator of future returns. The value of investments and the income from them is not guaranteed and may go down as well as up and investors may not get back the amount originally invested. Share class performance is based on 2pm prices, net of fees and gross of taxes, with gross income reinvested unless otherwise stated. Benchmark performance is priced at close of business, gross of fees and taxes. The impact of fees or other charges, including tax, where applicable, can be material on the performance of your investment. The impact of fees reduces your investment.

Royal London Global Equity Diversified Fund (Master Fund, USD)

Fund objective

The Fund's investment objective is to achieve capital growth over the long term, which should be considered as a period of 7-plus years. The Fund's performance target is to outperform, after the deduction of charges, the MSCI All Countries World Net Total Return Index USD (the "Benchmark") by 0.4 – 0.8% per annum over rolling three year periods. Investors should note that the Benchmark is being used by the Fund for performance comparison purposes only and the Fund does not intend to track the Benchmark.

Cumulative performance %

	Cumulative performance %					Annualised %	
	3M	6M	1Y	3Y	SI	3Y	SI
Share class	8.19	13.28	29.91	82.86	79.13	22.26	12.73
Benchmark	7.54	13.32	30.27	82.93	71.21	22.28	11.68

Benchmark: MSCI All Country World Index (MSCI ACWI) (Net Total Return, USD)

Past performance is not a guarantee or reliable indicator of future returns. The value of investments and the income from them is not guaranteed and may go down as well as up and investors may not get back the amount originally invested. Share class performance is based on close of business prices, net of fees and gross of taxes, with gross income reinvested unless otherwise stated. Benchmark performance is priced at close of business, gross of fees and taxes. The impact of fees or other charges, including tax, where applicable, can be material on the performance of your investment. The impact of fees reduces your investment.

This performance is for track record purposes only. The Fund is managed in the same way by the same team and is shown to provide an indication of long-term performance only.

Key concepts to understand

Capital growth: The rise in an investment's value over time.

Derivatives: A financial instrument whose price is dependent upon or derived from one or more underlying asset.

Dividend yield: The dividend yield reflects distributions declared over the past twelve months as a percentage of the mid-market price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions. Reported yields reflect RLAM's current perception of market convention around timing of bond cash flows.

Efficient Portfolio Management (EPM) techniques: The Fund may engage in EPM techniques including holdings of derivative instruments. The use of these instruments may expose the Fund to volatile investment returns and increase the volatility of the net asset value of the Fund. EPM techniques may involve the Fund entering into transactions with counterparties where there may be a risk of counterparty default. The Fund's ability to use EPM strategies may be limited by market conditions, regulatory limits and tax considerations.

Equities: Securities that represent an ownership interest in a company.

P/CF ratio (Price-to-cash flow ratio): It is used to determine the company's share value and to compare it to others or the market average. A low P/CF ratio may indicate that the company is undervalued, while a high P/CF ratio may suggest that the company is overvalued.

P/E ratio (Price-to-earnings ratio): The P/E ratio is used to determine a company's share value and compare valuations. A high P/E ratio may indicate high market expectations for future growth, while a low P/E ratio may suggest lower expectations for future performance.

Pricing: The Fund's price may swing to bid or offer to protect existing investors from the costs associated with buying or selling the fund's underlying assets when other investors are entering or leaving the fund. Performance is based on this pricing.

Rolling 3-year period: A rolling 3-year period is any period of three years, no matter which day you start on.

Fund risks

Investment risk: The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Counterparty risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Emerging markets risk: Investing in Emerging Markets may provide the potential for greater rewards but carries greater risk due to the possibility of high volatility, low liquidity, currency fluctuations, the adverse effect of social, political and economic instability, weak supervisory structures and accounting standards.

Exchange rate risk: Investing in assets denominated in a currency other than the base currency of the Fund means the value of the investment can be affected by changes in exchange rates.

Liquidity risk: In difficult market conditions the value of certain fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.

Efficient Portfolio Management (EPM) techniques: The strategies may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the strategy to increased price volatility.
