Royal London Sustainable Growth Fund

Quarterly Investment Report

31 March 2024

Quarterly Report

The fund as at 31 March 2024

The purpose of this report is to provide an update on the Royal London Sustainable Growth Fund. The report has been produced by Royal London Asset Management. The report starts with a summary dashboard showing key information about the fund. A glossary is located at the end of the report covering the description of some of the more technical terms used within the report. All data is as at the report date unless otherwise stated.

The fund

Fund performance objective and benchmark

The Fund's investment objective is to achieve capital growth over the medium term, which should be considered as a period of 3-5 years, by investing in a diverse range of equity and fixed income assets. Investments in the Fund will adhere to the Investment Manager's ethical and sustainable investment policy.

The Fund is actively managed, meaning that the Investment Manager will use their expertise to select investments to meet the objective. The IA Mixed Investments 40-85% Shares sector is considered an appropriate benchmark for performance comparison.

The IA Mixed Investments 40-85% Shares sector is considered an appropriate benchmark for performance comparison.

Performance commentary

The fund produced strong positive returns over the quarter. In particular, companies enabling and exposed to advancements in artificial intelligence (AI) performed well and were amid the top contributors to performance over the quarter. TSMC, which produces the world's most advanced semiconductor chips and has customers like Nvidia and Broadcom, witnessed strong performance over the period. ASML, which produces the world's most advanced semiconductor manufacturing equipment, continued to benefit from structural growth trends. In the US, many companies are benefiting from the huge amount of money being spent on physical infrastructure projects and part of that being a result of geopolitical tensions and deglobalisation, but also parts of it related to multiple decades of underinvestment in US infrastructure. These trends been beneficial to companies like Comfort Systems, a leading building and service provider for mechanical, electrical and plumbing systems. Core & Main was another strong contributor to performance, which is a relatively new holding for us. The company is the leading distributor of water infrastructure products in the US.

A key detractor during the quarter was HDFC Bank, India's leading private sector bank. It was a weak performer as a result of guiding down profitability targets following their merger with HDFC. AIA Group, Asia's leading life insurance company, was also weak, partly as a result of continually disappointing Chinese economic growth. Global leader in offshore wind SSE also detracted after reporting slightly disappointing quarterly results.

We have a portfolio exposed to some exciting and powerful multi-year structural growth themes – the key ones being the ongoing digitalisation of society through things such as cloud computing and AI, which we think we're incredibly early in. We also have exposure to companies enabling the development of a more sustainable and resilient physical world. These include areas such as HVAC (heating, ventilation and air conditioning), building electrification and more sustainable transport such as rail. We also continue to be excited by the opportunities in the healthcare sector where we observe advancements in computing are accelerating new drug discovery combined with large disease categories such as obesity emerging.

The corporate bond exposure outperformed sterling credit markets in the period, helped by a combination of our sector allocation and stock positioning, notably within the insurance and bank sectors. Our exposure to structured bonds was also a small negative due to our holding in Thames Water. While this holdings was negative, our bias remains in the safest part of the capital structure – operating company debt that is closest to the assets – and position sizing has reflected the differing risks and holdings remain part of a very diversified portfolio of lending decisions.

Performance and activity

Top 10 holdings

| | Weighting (%) |
|-----------------------------------|---------------|
| Alphabet Inc. Class A | 3.28 |
| Microsoft Corporation | 3.24 |
| Visa Inc. Class A | 3.00 |
| Thermo Fisher Scientific Inc. | 2.74 |
| Canadian National Railway Company | 2.62 |
| Schneider Electric SE | 2.60 |
| ASML Holding NV | 2.56 |
| IMCD N.V. | 2.36 |
| Broadcom Inc. | 2.34 |
| AstraZeneca PLC | 2.26 |
| Total | 27.00 |

Fund activity

Our sustainable strategies are orientated to those companies that have a net benefit to society and create value for investors through their products and services and the way they manage environmental, social and governance (ESG) issues. Areas such as healthcare and technology remain at the core of the equity portfolios, complemented by engineering, utilities, selected financial services, and companies that lead their industries in ESG performance. This means that we do not invest in some sectors, such as oil & gas, extractive industries or tobacco. We believe that the exposure to those sectors which offer a positive contribution to society is consistent with outperformance over the medium term. In addition, the sustainable credit proposition provides access to critical sectors that most investors can't access via equity markets. Key themes in the fixed income allocation include social housing, social & environmental infrastructure, community funding (regulated banks and building societies focused on SME and retail lending), financial inclusion & resilience (such as insurance products to support individuals through shocks) and the energy transition.

During the period, we exited our position in Stryker, a US medical equipment company. We continued to add exposure to some of our newer holdings, such as Core & Main, the leading distributor of water infrastructure products in the US, and add to our position in Latin American ecommerce and payments platform MercadoLibre. We also initiated new positions in global leading networking semiconductors and enterprise software company Broadcom and Spanish-listed banking group Banco Bilbao Vizcaya Argentaria which has a strong focus on Mexico and Latin America.

Within our fixed income exposure, structured bonds remain a cornerstone of our process and portfolios. Issuance has been somewhat low in recent months, but there were opportunities in the sector during the quarter. Examples included Land Securities and a rare new issue from Telereal – the latter secured on BT telephone exchanges.

Demand from annuity buyers has continued to support longer-dated high quality bonds. In a number of areas, this has pushed spreads to levels that we feel were unattractive, and we took advantage of the higher demand for these bonds to take profits and recycle into more attractive areas. Our exposure to social housing was an example of this. Here we took profits on Housing & Care 21, after spreads had tightened to materially lower levels than the wider market. These monies were initially recycled into gilts to maintain duration, but then reinvested into more attractive opportunities in both new issue and secondary market, including a new issue from BPHA, who manage almost 20,000 homes across to Oxford to Cambridge corridor and we feel have strong EPC performance – indicating strong energy efficiency across their portfolio, at an above market average yield.

Fund breakdown

Sector weights

Characteristics and climate

ESG characteristics rationale

The Fund focuses on the sustainability of the products and services of the companies it invests in, as well as their standards of environmental, social, governance ("ESG") management, alongside financial analysis. The investment approach is fundamentally based on positive screening; identifying companies that are making a positive contribution towards a cleaner, healthier, safer and more inclusive society, through assessing both what a company does and how it does it, and through active engagement to encourage continual improvement. The fund will not invest in companies that undertake business activities deemed to be detrimental to society and that breach our Do No Significant Harm principle. Further details of the Funds Sustainable Investment process can be found in the ethical and sustainable investment policy at www.rlam.com

ESG characteristics

| | Yes | No |
|--|-----|----|
| ESG integration | ✓ | |
| Promotes environmental or social characteristics | | ✓ |
| Sustainable fund objective | ✓ | |
| Additional exclusions | ✓ | |

Additional exclusions

Exclusion criteria that make sure a fund does not invest into a specific service or product. Royal London Asset Management has a controversial weapons exclusion across all investments.

| | | | |
|-----------------------|---|---------------------------|---|
| Adult entertainment | ✓ | High environmental impact | ✓ |
| Alcohol | ✓ | Human rights issues | ✓ |
| Animal welfare | ✓ | Nuclear power | ✓ |
| Armaments | ✓ | Nuclear weapons | ✓ |

Climate metrics

| | Fund | Benchmark | Difference (%) |
|---|--------|-----------|----------------|
| Financed emissions (tCO2e) | 1,664 | n/a | n/a |
| Financed emissions coverage | 81.75% | n/a | n/a |
| Carbon footprint (tCO2e/\$M invested) | 10.32 | n/a | n/a |
| Carbon footprint coverage | 81.75% | n/a | n/a |
| Weighted average carbon intensity (tCO2e/\$M sales) | 42.26 | n/a | n/a |
| Weighted average carbon intensity coverage | 96.01% | n/a | n/a |

All climate metrics presented above are for Scope 1-2 emissions. Unless specified in the objective, the data is for information only and should not be taken to mean they are being managed to/controlled.

Implied temperature rise

| | Fund (%) | Benchmark (%) | Difference (%) |
|---|----------|---------------|----------------|
| Implied temperature rise (ITR) coverage | 81.75 | n/a | n/a |
| % of portfolio below 2°C ITR | 52.97 | n/a | n/a |
| % of portfolio below 1.5°C ITR | 33.12 | n/a | n/a |

SBTi net - zero

| | Fund (%) | Benchmark (%) | Difference (%) |
|----------------------------|----------|---------------|----------------|
| SBTi Net-Zero committed | 31.85 | n/a | n/a |
| SBTi Near-Term committed | 14.03 | n/a | n/a |
| SBTi Near-Term targets set | 42.57 | n/a | n/a |

Fund Engagement

Engagement definition

Engagement is active dialogue with investee companies (or other entities). There are two types: engagement for information, which is dialogue as part of investment research or ongoing monitoring, without specific objectives for change, and engagement for change, which is purposeful dialogue to influence positive change, with defined objectives and demonstrable outcomes.

Engagements

| Engagement activity | Fund 3 months | Fund 12 months |
|----------------------------|---------------|----------------|
| Number of entities engaged | 18 | 58 |
| Number of engagements | 22 | 122 |

This is an estimate. Some engagements at the issuer level may not have been attributed to the specific bond held in the fund, resulting in a lower number of engagement activities.

Total engagements by theme and topic

| | |
|---|-----------|
| Climate | 6 |
| Climate - Transition Risk | 5 |
| Climate - Physical Risk | 1 |
| Governance | 20 |
| Corporate Governance | 8 |
| Remuneration | 8 |
| Strategy | 3 |
| Board | 1 |
| Social & Financial Inclusion | 5 |
| Just transition | 2 |
| Labour & Human Rights | 2 |
| Social & Financial inclusion | 1 |

Engagement focus

Firm-wide engagement activity is centred around six themes which we have identified in consultation with our clients. These are: climate change; biodiversity; health; governance and corporate culture; social and financial inclusion; innovation, technology and society. Portfolio level engagements are not thematic and are focussed on issues specific to managing the portfolio and meeting the investment objective.

Engagement data represents all engagements undertaken at both firm and portfolio level across Royal London Asset Management, and may not be limited to those undertaken solely for the purpose of managing the fund.

Fund Engagement

Engagement outcomes

HSBC Bank Plc - Just Transition

Purpose:

To review and provide feedback on the company's draft Net Zero Transition Plan.

Outcome:

HSBC's Net Zero Transition Plan, informed by GFANZ and TPT, sets a strategic vision for sector specific transitions and an actionable plan. In a feedback session with the Chief Sustainability Officer, the company highlighted its commitment to the real economy decarbonisation, especially in developing markets. The plan details a sectoral approach based on global financing needs, and HSBC's strategies to support decarbonisation and leverage financing opportunities. It also emphasises a fair and inclusive transition, with ongoing efforts to integrate just transition principles. We will continue to engage with the company, placing particular emphasis on the operationalisation of their commitment to a just transition.

National Australia Bank - Just Transition

Purpose:

To foster transparency and accountability, we encourage the company to disclose its strategy for incorporating just transition considerations into its decarbonisation efforts. Furthermore, we sought clarity on the company's responsible lending practices within their microfinance operations.

Outcome:

National Australia Bank (NAB) is committed to a just transition and microfinance, recognising the interconnection between the two as microfinance plays a crucial role in supporting communities affected by the energy transition. The company is developing a just transition plan and contributing to the 'UNGC Think Lab on Just Transition' for business guidance. Its microfinance efforts are philanthropic, aligning with its place-based strategy for a just transition. Good Shepherd, the company's partner, conducts internal audits and quality processes. NAB advocates for responsible microfinance and is encouraged to promote these practices nationally.

Fund Engagement

Engagement outcomes

South West Water - Water Utilities

Purpose:

To assess how South West Water's most recent water asset management plan for the period 2025 to 2030 aligns with our water sector expectations of best practice and identify areas where improvement is needed.

Outcome:

The meeting with South West Water concluded positively, with the company providing further insights into its proactive environmental initiatives and upstream thinking, aimed at addressing biodiversity concerns. The company is shifting towards integrating natural capital into its decision making. It has also piloted natural capital catchment plans and conducted detailed reviews of water challenges. In addition, South West Water is at the forefront of assessing antimicrobial resistance (AMR) risks and is collaborating with the University of Exeter to enhance its understanding in this domain. We will be reassessing the company based on its latest disclosure to our investor expectations and share areas of improvement with it.

Fund Voting

Total proxy voting activity

Executive remuneration voting activity

Notable votes

Intuit Inc

Advisory vote on executive compensation - against: The LTIP continues to raise some concerns with noted retesting opportunities and short performance periods. We would also prefer to see a more stretching set of performance metrics under variable incentive plans.

Amendment to the 2005 Equity Incentive Plan - against: We have concerns over the total dilution from all the plans under this amendment.

Ratification of Auditor - against: There are concerns over the auditor's independence given the length of tenure.

Report on Portfolio Risk in Employee Retirement Options (Shareholder Proposal - SHP) - against: The company's 401(k) plans offer participants a diverse array of investment options, including a self-directed brokerage account that allows participants to choose ESG-related investments.

Fund Voting

Notable votes

Sika AG

Compensation Report - abstain - There was a fatality recorded at one of the company's operational sites, however, we are concerned by the compensation committee's assessment of bonus safety metrics for the year under review.

Elect Monika Ribar - against - The nominee is not considered independent due to length of tenure and serves on the Audit Committee that lacks sufficient independence in our view.

Elect Paul Schuler - against - The nominee is not considered independent and serves on the Remuneration Committee that lacks sufficient independence in our view.

Visa Inc

Elect Denise M. Morrison - against: The nominee is chair of the remuneration committee and we have long-standing concerns with the company's remuneration.

Advisory vote on executive compensation - against: We remain concerned over the large area of discretion applied to bonus outcomes. We also take issue with the scale of discretionary awards granted during the year.

Severance Approval Policy (SHP) - against: While we are supportive of the request to seek shareholder approval for severance payments valued at 2.99 times the sum of the salary and target bonus, we note that the company has already adopted such a policy.

Market commentary

Market overview

A key theme to emerge during the quarter was indication of a more favourable global macro backdrop. Despite some mixed signals, the US economy remains resilient, while Europe and the UK show signs of gradually exiting their recessions. Activity in China also seems to be stabilising. At the same time, core central banks are still confident that the disinflation trend remains intact, despite some recent setbacks in inflation prints. Policymakers have often highlighted that they are in no rush to cut rates – with markets now generally pricing the start of the easing cycles to begin this summer. The Federal Reserve, European Central Bank and Bank of England all left interest rates unchanged over the quarter.

One major development over the quarter is that markets have recalibrated their pricing for expected central bank cuts over this year. At the end of last year, markets were pricing in an aggressive rate cutting cycle, but then swiftly move to temper those forecasts. This re-pricing contributed to negative returns for global government bond markets over the quarter. Despite the belief of many that it was the anticipation of a 'Fed-pivot' that contributed to the rally in equity markets in late 2023, equity markets proved to be immune to this bond market sell-off as global growth and business confidence showed signs of resilience and investors focused on the potential offered by AI.

Market strength seen in the fourth quarter of 2023 continued though the first three months of 2024 as a result of generally supportive macroeconomic data and indications that the majority of developed market central banks are planning to cut interest rates in 2024. Q4 2023 corporate results were also notably better than Q3 2023 which supported markets. The best performing sectors in the quarter were information technology, communication services and energy while real estate, utilities and materials underperformed.

Some of the same trends that were driving markets during the fourth quarter continued into the first quarter of 2024. The tech sector continues to benefit from the excitement around AI and industrials continued to experience a tailwind from a resilient macro backdrop combined with government stimulus towards infrastructure spending. The energy sector benefitted from higher oil prices though the quarter.

Government bonds produced negative returns as yields rose in all the major markets but the sterling investment grade credit market (iBoxx non-gilt index) returned 0.06% over the quarter, with the effect of higher yields mitigated by tighter credit spreads and the higher carry in this area.

Outlook

Combined with ongoing macroeconomic uncertainty, one thing we see as likely to continue through 2024 is heightened geopolitical tensions around the world. That said, though, these tensions might be a tailwind to some of our construction and infrastructure related investments, as it will likely serve to only accelerate these trends towards onshoring and near shoring. The macro environment remains complex and confusing, but we continue to have high conviction in the underlying drivers of the companies in which we are invested and in many cases find valuations to be undemanding.

Markets have moved significantly over the last six months, pricing in peak interest rates, yet history has taught us the macroeconomic environment can change quickly. We are not macroeconomic forecasters and refrain from predicting the direction of interest rates or inflation but evidence is accumulating that we might be at peak interest rates. We believe longer-term microeconomic trends are more important drivers of investment returns and should be the focus of investors.

There is a narrative that sustainable investing is becoming less relevant given the economic and political changes we have seen over the last few years, however we believe the drive towards a more sustainable society which we define as cleaner, healthier, safer, and more inclusive continues unabated. When looking at markets we see sustainability becoming more, not less relevant and is illustrated by, but not limited to, trends in digitalisation through artificial intelligence, infrastructure through electrification and healthcare through obesity drugs. These trends make us optimistic about the long-term outlook for sustainable investing.

We will continue to follow our process which has served us well over the years and believe our portfolios focused on high quality sustainable and financial companies that are well positioned to drive long-term performance.

Looking at fixed income markets, with yields generally higher than they were at the start of the year, and interest rate cuts closer, we believe that overall government bond yields look attractive. Credit spreads have come in further – and are now looking somewhat tight in longer-dated bonds – but continue to compensate credit investors for the risk of default.

We target – and achieve – a material yield premium over the market level in our credit strategies. We mitigate the risks by maintaining highly diversified portfolios, with a bias towards bonds that offer greater security and downside protection. Our view remains that over the medium term our focus on delivering greater income than the benchmark will generate outperformance.

Risks and Warnings

Investment risk

The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

EPM techniques risk

The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Exchange rate risk

Changes in currency exchange rates may affect the value of your investment.

Liquidity risk

In difficult market conditions the value of certain fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.

Emerging markets risk

Investing in Emerging Markets may provide the potential for greater rewards but carries greater risk due to the possibility of high volatility, low liquidity, currency fluctuations, the adverse effect of social, political and economic instability, weak supervisory structures and accounting standards.

Counterparty risk

The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Responsible investment risk

The Fund can only invest in holdings that demonstrate compliance with certain sustainable indicators or ESG characteristics. This reduces the number securities in which the Fund can invest and there may as a result be occasions where it forgoes more strongly performing investment opportunities, potentially underperforming non-sustainable funds.

Performance to 31 March 2024

Glossary

Carbon footprint

Exposure to high emitters in the portfolio, expressed in tCO₂e/\$M invested. Financed emissions are divided by the portfolio value, the same approach for listed companies and private issuers is applied in this metric.

ESG Integration

The systematic and explicit inclusion of environmental, social and governance (ESG) factors into investment analysis and investment decisions.

Exclusions

Explicitly prohibits investing in a particular company, sector, business activity, country or region.

Financed emissions

The emissions from activities in the real economy that are financed through lending and investment portfolios, expressed in tCO₂e. Emissions are attributed to a portfolio based on the portion of the company's value the portfolio holds, and using different accounting values for public and private corporates. We provide financed emissions for scope 1 and 2 emissions.

Fund restrictions definitions

Adult Entertainment: Companies which own or produce adult entertainment services, or engage in the distribution or sale of adult entertainment services.

Alcohol: Companies which have involvement in brewing, distillation or sale of alcoholic drinks.

Animal Welfare: Companies that conduct animal testing (other than for purposes of human or animal health and/or where it is required by law or regulation).

Armaments: Companies who manufacture armaments or nuclear weapons or associated products.

Controversial Weapons: Weapons which have an indiscriminate and disproportional impact on civilians or weapons that are illegal and prohibited by international conventions and treaties.

Fossil Fuels: Companies involved in the exploration, extraction or refining of oil, or gas, or coal, plus any activity relating to thermal coal.

Gambling: Companies who promote irresponsible gambling which includes betting shops, casinos or amusement arcades.

High Environmental Impact: Companies which have a high environmental impact, and which have 'no evidence' of appropriate environmental management systems.

Human Rights Risks: Companies with a strategic presence operating in countries of concern and which have 'no evidence' of policies or systems to manage human rights risks.

Nuclear Power: Companies who generate energy from Nuclear Power.

Nuclear Weapons: Companies that manufacture, nuclear; or are involved in the production of intended-use parts, whole weapons systems, or exclusive delivery platforms.

Tobacco: Companies which are growing, processing or selling tobacco products.

Fund value

Total value of the fund as of the last business day of the calendar month. The fund value is as at close of business and on a mid-price basis.

Implied temperature rise (ITR)

ITR aims to measure the global warming outcome from the emissions trajectory of a company, if the whole economy followed the same trajectory.

Number of holdings

Total number of unique holdings of the Fund excluding cash, currency and derivatives.

Performance

Performance is calculated using the daily end of day NAV per share produced by HSBC based on the mid price.

Promotes environmental or social factors

An ESG Fund promotes, among other characteristics, environmental or social characteristics, or a combination of those characteristics, provided that the companies in which the investments are made follow good governance practices.

Regional weights

Breakdown of holdings by country of risk relative to the benchmark index and grouped using RLAM's proprietary regional classification scheme.

SBTi

The Science-Based Targets initiative is a consortium of organisations that set up the definition and promotion of science-based target setting.

Glossary

Sector weights

Breakdown of holdings by FTSE ICB (Industry Classification Benchmark) sector relative to the benchmark index.

Sustainable fund objective

A product that has sustainable investment or a reduction in carbon emissions as its objective.

Top 10 holdings

Top 10 assets held by market value, excluding derivatives and cash.

Weighted Average Carbon Intensity (WACI)

Portfolio's exposure to carbon-intensive companies, expressed in tCO₂e / \$M revenue. Scope 1 and scope 2 GHG emissions are divided by companies revenues, then multiplied based on portfolio weights (the current value of the investment relative to the current portfolio value). The WACI is calculated as a weighted average sum of the holdings with carbon intensity coverage.
