Royal London Global Sustainable Credit Fund

Quarterly Investment Report

31 March 2025

Quarterly Report

The fund as at 31 March 2025

The purpose of this report is to provide an update on the Royal London Global Sustainable Credit Fund. The report has been produced by Royal London Asset Management. The report starts with a summary dashboard showing key information about the fund. A glossary is located at the end of the report covering the description of some of the more technical terms used within the report. All data is as at the report date unless otherwise stated.

The fund

Fund performance objective and benchmark

The Fund's investment objective is to outperform the Bloomberg Global Aggregate Corporate Hedged USD (the "Benchmark") by 0.75% per annum over rolling three year periods (gross of fees). The Benchmark is being used by the Fund for performance comparison purposes only and the Fund does not intend to track it.

Performance commentary

The fund performed broadly in line with the index over the quarter (M Acc USD). US investment grade exposure saw mixed effects: the fund has a below benchmark exposure to this market, which was negative for relative returns, but more than offset by our long duration bias in this market, which benefited from the fall in US treasury yields.

All issuers within our sustainable holdings offer a net benefit to society through either their products/services or their operations. As well as reducing risk, we seek out opportunities that are under-researched e.g., bonds that do not fall into mainstream indices or benchmarks and/or are unrated by ratings agencies. Importantly, the sustainable credit proposition provides access to critical sectors that most investors can't access via equity markets. Key themes in the funds include social housing, social & environmental infrastructure, community funding (regulated banks and building societies focused on SME and retail lending), financial inclusion & resilience (such as insurers offering products which protect individuals and businesses from unexpected events) and the energy transition. On sustainability grounds, we have no exposure to bonds of oil & gas companies or extractive industries. We are also underweight in the general industrial and consumer goods sectors, and to a lesser extent in consumer services.

Driving the outperformance was our stock selection, where our bank bonds were standout performers, led by Lloyds Bank, BNP Paribas and BBVA. There was also strong performance from healthcare-related names including Molnycke, Steris and Thermo Fisher.

Fund activity

We continued to invest in bonds that meet both our demanding financial and sustainable criteria, and which fit into the sustainable themes that we think will endure and offer long-term solutions to the challenges that the world faces. We also aim to construct the fund to ensure that it yields more than the benchmark index. We believe that this positioning will be beneficial in the medium term, given the current valuation of credit markets and attractive opportunities we see.

The additional sustainable criteria we use mean that our portfolio will tend to have certain differences with the benchmark index. For instance, while it will have significant exposure to the banking sector, this is typically much lower in US banks than the index, reflecting the higher weighting of investment banks that typically do not score well on our criteria. In addition, the portfolio will usually have much lower exposure to China and India, where issuers may look attractive in financial terms, with many offering significant yield premia, but again do not score well on our criteria.

Issuance was somewhat lower than the same period last year - reflecting the greater uncertainty over interest rates, macro outlook and impact of tariffs. However, there were still interesting opportunities available in the primary and secondary markets.

Financials remain a key area given greater activity in this area. The fund took part in new subordinated debt issues from UK high-street lender NatWest and insurance giant Legal & General. We also added to senior bonds in this area, particularly in the second half of the quarter after spreads in the sector had tightened and as concerns over macro uncertainty increased, adding new issues from favoured names such as HSBC and ING.

Other activity was across diversified sectors, including a new 2045 bond from regular issuer Motability, who help disabled people and their families lease cars, scooters or wheelchairs. In the water sector, an area where we continue to see value, we added a new issue Yorkshire Water, with the bonds seeing good spread levels following widening in the sector.

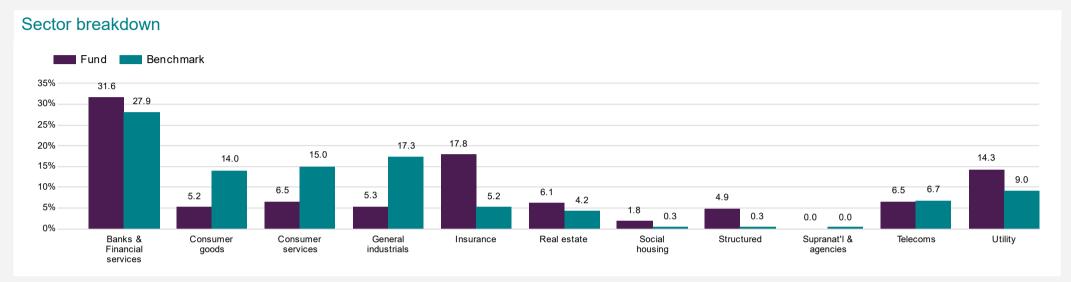

Structured bonds also remain an area we find value. During the quarter we took part in a new issue from Together Financial Services. The bond, issued by a special purpose securitisation vehicle, is supported by a portfolio of second charge owner occupied and buy-to-let loans secured against residential property in England, Scotland and Wales.

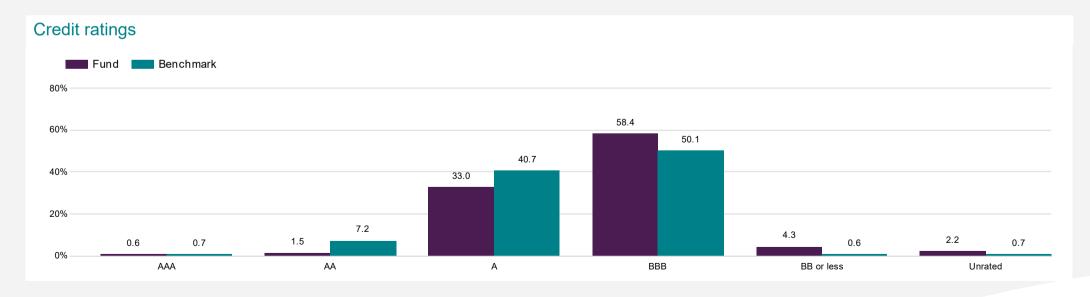

Social housing also offers a degree of security over unsecured bonds, as well as fulfilling an important societal need. We added a new issue from Notting Hill Genesis, who own and manage more than 60,000 homes across London - the bonds providing a credit spread in excess of market average.

Fund breakdown

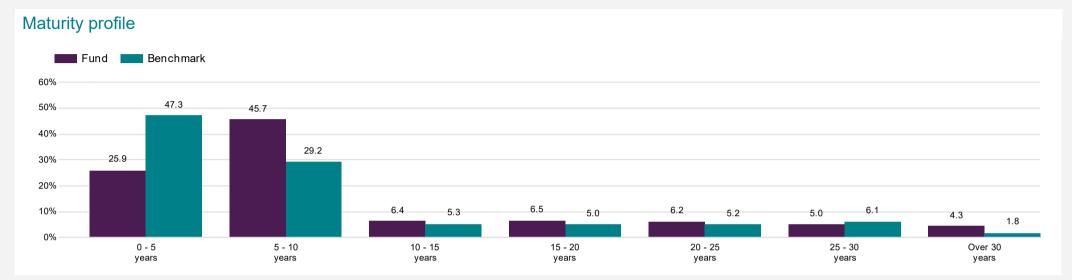

The fund

Fund breakdown

ESG characteristics rationale

The Fund focuses on the sustainability of the products and services of the companies it invests in, as well as their standards of environmental, social, governance ("ESG") management, alongside financial analysis. The investment approach is fundamentally based on positive screening; identifying companies that are making a positive contribution towards a cleaner, healthier, safer and more inclusive society, through assessing both what a company does and how it does it, and through active engagement to encourage continual improvement. The fund will not invest in companies that undertake business activities deemed to be detrimental to society and that breach our Do No Significant Harm principle. Further details of the Funds Sustainable Investment process can be found in the ethical and sustainable investment policy www.rlam.com/uk/individual-investors/policies-and-regulatory/

ESG characteristics

SBTi Net-Zero committed	14.03	11.54	21.55
SBTi Near-Term committed	9.86	4.76	107.20

Fund Engagement

Engagement definition

Engagement is active dialogue with investee companies (or other entities). There are two types: engagement for information, which is dialogue as part of investment research or ongoing monitoring, without specific objectives for change, and engagement for change, which is purposeful dialogue to influence positive change, with defined objectives and demonstrable outcomes.

Engagements

Engagement activity	Fund 3 months	Fund 12 months
Number of entities engaged	13	36
Number of engagements	15	83

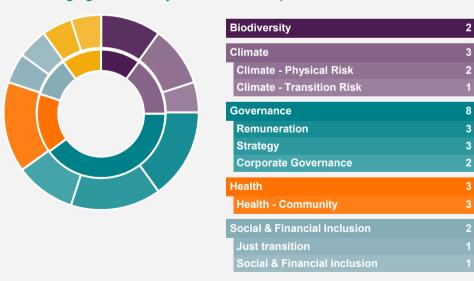

This is an estimate. Some engagements at the issuer level may not have been attributed to the specific bond held in the fund, resulting in a lower number of engagement activities.

Engagement focus

Firm-wide engagement activity is centred around six themes which we have identified in consultation with our clients. These are: climate change; nature and biodiversity; health; governance and corporate culture; social and financial inclusion; innovation, technology and society. Portfolio level engagements are not thematic and are focussed on issues specific to managing the portfolio and meeting the investment objective.

Engagement data represents all engagements undertaken at both firm and portfolio level across Royal London Asset Management, and may not be limited to those undertaken solely for the purpose of managing the fund.

Total engagements by theme and topic

Technology, Innovation & Society		
	Cybersecurity	1
	Technology & Society	1

The numbers of engagements and themes/topics discussed may differ where a single engagement covers multiple themes/topics.

Fund Engagement

Engagement outcomes

AT&T Inc - Cybersecurity

Purpose:

We attended an ESG investor event hosted by AT&T, an American telecommunications company, to gain insights into its updated business strategy. During the event, we posed questions to better understand the company's approach to managing cybersecurity risks.

Outcome:

The company shows a strong commitment to cybersecurity, collaborating with federal agencies in the USA and securing \$650 million in cyber insurance. Governance is overseen by the AT&T Board's Audit Committee, which regularly discusses cybersecurity risks and measures with the Chief Information Security Officer and Chief Technology Officer. AT&T's security policies align with various standards and frameworks and privacy laws like the California Consumer Privacy Act. The company also completes annual third-party audits to ensure compliance with global ISO/IEC 27001 certifications. We were satisfied with AT&T's approach to cybersecurity and will continue to monitor the company's activity.

Steris Plc - Environment

Purpose:

We met with Steris, a global provider of products and services focused on infection prevention and sterilisation, to gain more information on the Ethylene Oxide lawsuit, understand its management processes, and discuss alternatives to ethylene oxide in sterilisation.

Outcome:

Overall, the call with Steris gave us confidence that its monitoring of Ethylene Oxide exceeded the US' Environmental Protection Agency (EPA) requirements. In response to new EPA requirements, the company has further enhanced its operations to meet these standards. Steris engages with regulators and lobbies for better industry practices, although the company noted pushback from Original Equipment Manufacturers to design products compatible with alternative sterilisation techniques. Despite this, Steris has invested in other methods, such as x-ray sterilisation, and estimates that approximately 15% of items currently sterilised with Ethylene Oxide could transition to x-ray sterilisation.

Fund Engagement

Engagement outcomes

Unite Group Plc - Remuneration

Purpose:

The purpose of the shareholder consultation letter from Unite Group, the UK's largest provider of student accommodation, was to inform shareholders about the proposed changes to the executive remuneration policy and to invite their feedback. The consultation aimed to gather shareholder input to inform the Remuneration Committee's decision-making process.

Outcome:

The outcome of the consultation was positive, with broad support from shareholders for the proposed changes. The Remuneration Committee received feedback from 12 shareholders representing approximately 45% of the issued share capital, as well as from key proxy advisors. The Committee discussed the feedback in detail and finalised the proposals, which will be submitted for approval at the 2025 AGM. The key changes include increasing the maximum annual bonus opportunity and removing the annual bonus deferral requirement for directors who meet their shareholding guidelines. We view the changes as moderate and reasonable.

Wessex Water Ltd - Water project

Purpose:

Wessex Water responded to our request for a meeting following the release of its updated company scores which were derived from our scoring methodology based on public disclosures and company engagement in 2024. The meeting provided an opportunity to discuss areas for improvement, including pollution management, antimicrobial resistance (AMR), biodiversity, and climate-related physical risks.

Outcome:

The company highlighted its pollution control efforts, including the use of machine learning to detect sewer changes during rain and the importance of predictive analytics in preventing spills. Wessex Water also addressed antimicrobial resistance (AMR), emphasising its participation in the Chemicals Investigations Programme, a UK water industry initiative that investigates trace chemical substances in the water environment to comply with current and emerging legislation, and the need for green prescribing, which supports people to engage in nature-based interventions and activities to improve their mental and physical health.

Wessex Water discussed its approach to managing Sites of Special Scientific Interest (SSSIs) and the challenges posed by nutrient programmes. The company outlined the near-term opportunities and risks associated with its £850m total expenditure. The discussion also covered physical climate risks, particularly the importance of sustainable drainage to manage increased rainfall. Wessex Water plans to initiate the funding process for 2025-2030 and conduct a double materiality assessment, with updates to be provided in the next investor roadshow.

Market commentary

Market overview

The year kicked off with relative stability, following a turbulent fourth guarter of 2024, with the global economy seeing modest growth and central banks easing monetary policy as inflation remained well below the peak levels of recent years. As the quarter progressed, however, stability gave way to volatility, primarily due to elevated policy uncertainty in the US, with President Donald Trump pivoting away from Europe; the spectre of aggressive tit-for-tat tariffs; and Europe's fiscal regime change, led by Germany looking to alter decades of fiscal policy stability and ramp up spending, principally in relation to defence.

The increasingly uncertain US policy backdrop and related disruptions to global trade seem likely to weigh on growth in the US and beyond. Fiscal stimulus may provide something of a shield in economies like the euro area and China. A few more gradual and careful rate cuts are likely in major economies (except in Japan), but the US inflation outlook is uncertain enough that US rate hikes can't be ruled out either.

The result of this was weakness in global equity indices as US tech stocks saw a dramatic selloff following news of Chinese competitor, DeepSeek, European and UK stocks fared much better, posting positive total returns for the three months. Government bond yields also suffered from heightened volatility. In the UK and Germany, 10-year yields rose considerably, while US treasuries saw a significant increase.

Most major central banks are running with interest rates slightly above neutral. If growth remains positive and inflation remains moderate, then central banks can continue to cut towards neutral. But stickier than expected inflation, substantial policy uncertainty, and rates being closer to neutral suggests that at least some slowing of the pace makes sense beyond just the US.

In the US, at its final meeting of the quarter, the Federal Reserve, as expected, kept rates on hold with the Fed Funds target range at 4.25-4.50%. With them seeing the US economy as "strong overall", the Fed feels they are in a good place. Chair Powell noted that they are at a position, where the bank can cut and they can hold (perhaps notably not mentioning a possible hike). Participant forecasts still have two rate cuts in them for 2025. Broader Fed commentary continued to indicate that they are not in a hurry to cut rates. In a very uncertain environment, it makes sense to wait until things are clearer and "we'll be adapting as we go," said Powell.

At its final meeting in the quarter, the European Central Bank cut rates 25bps, to 2.50% on the deposit rate, which was very much as expected. The ECB continues to describe the disinflation process as well on track and continues to "follow a data-dependent and meeting-by-meeting

approach" without pre-committing to a particular path. They still see the skew of risks to growth as to the downside.

Government bond markets suffered heightened volatility over the guarter, amid ongoing political noise across Europe and the US. In the US, 10-year treasury yields fell to 4.21% from 4.57%, while German 10-year bunds yields rose to 2.70% from 2.36%. Benchmark 10-year gilt yields increased to 4.68% from 4.57%.

Global corporate bonds saw modest positive returns in local currency terms over the quarter. US dollar markets were the strongest performing, although this was largely due to the fall in US treasury yields, with spreads slightly wider over the period. Euro and sterling credit markets saw similar, much more modest gains, driven by different underlying factors: euro markets had the headwind of higher yields, but more than offset this with tighter spreads, while sterling market shrugged off wider spreads helped by the impact of the high carry in the asset class.

Outlook

Amidst global geopolitical and macroeconomic uncertainties affecting global government bond markets, we believe that credit markets still offer attractive sources of value for those prepared to look carefully. In a diversified portfolio, we believe that we can generate good levels of income by taking appropriate levels of risk but ensuring, where possible, mitigation of those risks.

At the margin, we have taken advantage of further spread tightening to reduce risk, primarily through selling financials into structured bonds. We remain overweight in the financials, particularly subordinated bonds, but with a smaller overweight than we had at the start of 2025. We will continue to take a pragmatic view - trimming exposure if spreads reach levels where we feel we can add yield or reduce risk by switching into other bonds - but avoiding a widespread move to reduce exposure to any given sector.

We believe that investment grade all-in yields remain attractive but near term absolute performance is likely to be largely influenced by movements in the yields of underlying government bond markets. Macro uncertainty may mean that economically sensitive or cyclical industrial and consumer sectors struggle, but we believe that there are opportunities right across the credit universe. We retain a focus on high levels of diversification and our view remains that over the medium term, our focus on delivering attractive income will support returns in the medium term and through the present environment of volatile yields and potentially wider spreads.

Royal London Asset Management - Quarterly Investment Report - Royal London Global Sustainable Credit Fund - EN - 2025-03-31-GB - Report ID: 235157

Risks and Warnings

Investment risk

The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Credit risk

Should the issuer of a fixed income security become unable to make income or capital payments, or their rating is downgraded, the value of that investment will fall. Fixed income securities that have a lower credit rating can pay a higher level of income and have an increased risk of default.

EPM techniques risk

The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Exchange rate risk

Changes in currency exchange rates may affect the value of your investment.

Interest rate risk

Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital. Unlike the income from a single fixed interest security, the level of income (yield) from a fund is not fixed and may go up and down. Bond yields (and as a consequence bond prices) are determined by market perception as to the appropriate level of yields given the economic background.

Liquidity risk

In difficult market conditions the value of certain fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.

Emerging markets risk

Investing in Emerging Markets may provide the potential for greater rewards but carries greater risk due to the possibility of high volatility, low liquidity, currency fluctuations, the adverse effect of social, political and economic instability, weak supervisory structures and accounting standards.

Responsible investment risk

The Fund can only invest in holdings that demonstrate compliance with certain sustainable indicators or ESG characteristics. This reduces the number securities in which the Fund can invest and there may as a result be occasions where it forgoes more strongly performing investment opportunities, potentially underperforming non-sustainable funds.

Derivative risk

Derivatives are highly sensitive to changes in the value of the underlying asset which can increase both Fund losses and gains. The impact to the Fund can be greater where they are used in an extensive or complex manner, where the Fund could lose significantly more than the amount invested in derivatives.

Glossary

Asset allocation

The fund

Based on RLAM's holistic approach to fixed income management and fund weights relative to their respective benchmarks. May not reflect tactical exposures.

Carbon footprint

Exposure to high emitters in the portfolio, expressed in tCO2e/\$M invested. Financed emissions are divided by the portfolio value, the same approach for listed companies and private issuers is applied in this metric.

ESG Integration

The consideration of environmental, social and governance (ESG) risk as part of the investment process. ESG integration does not mean the fund is trying to achieve a particular positive ESG outcome. Please check prospectus documentation for details on specific fund-level objectives.

Exclusions

Explicitly prohibits investing in a particular company, sector, business activity, country or region.

Financed emissions

The emissions from activities in the real economy that are financed through lending and investment portfolios, expressed in tCO2e. Emissions are attributed to a portfolio based on the portion of the company's value the portfolio holds, and using different accounting values for public and private corporates. We provide financed emissions for scope 1 and 2 emissions.

Fund restrictions definitions

Adult Entertainment: Companies which own or produce adult entertainment services, or engage in the distribution or sale of adult entertainment services.

Animal Welfare: Companies that conduct animal testing (other than for purposes of human or animal health and/or where it is required by law or regulation).

Armaments: Companies who manufacture armaments or nuclear weapons or associated products.

Controversial Weapons: Weapons which have an indiscriminate and disproportional impact on civilians or weapons that are illegal and prohibited by international conventions and treaties.

Fossil Fuels: Companies involved in the exploration, extraction or refining of oil, or gas, or coal, plus any activity relating to thermal coal.

Gambling: Companies who promote irresponsible gambling which includes betting shops, casinos or amusement arcades.

High Environmental Impact: Companies which have a high environmental impact, and which have 'no evidence' of appropriate environmental management systems.

Human Rights Risks: Companies with a strategic presence operating in countries of concern and which have 'no evidence' of policies or systems to manage human rights risks.

Nuclear Power: Companies who generate energy from Nuclear Power.

Nuclear Weapons: Companies that manufacture, nuclear; or are involved in the production of intended-use parts, whole weapons systems, or exclusive delivery platforms.

Tobacco: Companies which are growing, processing or selling tobacco products.

Alcohol: Companies which have involvement in brewing, distillation or sale of alcoholic drinks.

Gross redemption yield

Gross redemption yield is the rate of discount at which a bond's future obligations of interest and capital payments equates to its current price. The gross redemption yield shown for the fund is the average for its individual holdings, weighted by their current value, net of relevant fund management costs and gross of tax.

Implied temperature rise (ITR)

ITR aims to measure the global warming outcome from the emissions trajectory of a company, if the whole economy followed the same trajectory.

Number of holdings

Total number of unique holdings of the Fund excluding cash, currency and derivatives.

Number of issuers

Number of unique issuers of all assets held by the Fund, excluding cash, currency and derivatives.

Promotes environmental or social factors

An ESG Fund promotes, among other characteristics, environmental or social characteristics, or a combination of those characteristics, provided that the companies in which the investments are made follow good governance practices.

SBTi

The Science-Based Targets initiative is a consortium of organisations that set up the definition and promotion of science-based target setting.

Glossary

Sustainable fund objective

A product that has sustainable investment or a reduction in carbon emissions as its objective.

Top 10 holdings

The fund

Top 10 assets held by market value, excluding derivatives and cash.

Weighted Average Carbon Intensity (WACI)

Portfolio's exposure to carbon-intensive companies, expressed in tCO2e / \$M revenue. Scope 1 and scope 2 GHG emissions are divided by companies revenues, then multiplied based on portfolio weights (the current value of the investment relative to the current portfolio value). The WACI is calculated as a weighted average sum of the holdings with carbon intensity coverage.

In line with our bespoke and targeted approach to credit analysis, we have developed an in-house carbon data tool that addresses coverage and mapping issues with third party systems. The development of this tool has been a critical element of RLAM's ESG integration into our credit process, addressing coverage and mapping issues with third party systems. This enhanced coverage is reflected in the WACI figures provided in this report, with all other metrics instead being based on data from MSCI.
