Royal London Global Sustainable Credit Fund

Quarterly Investment Report

30 September 2025

Quarterly Report

The fund as at 30 September 2025

The purpose of this report is to provide an update on the Royal London Global Sustainable Credit Fund. The report has been produced by Royal London Asset Management. The report starts with a summary dashboard showing key information about the fund. A glossary is located at the end of the report covering the description of some of the more technical terms used within the report. All data is as at the report date unless otherwise stated.

The fund

Fund performance objective and benchmark

The Fund's investment objective is to outperform the Bloomberg Global Aggregate Corporate Hedged USD (the "Benchmark") by 0.75% per annum over rolling three year periods (gross of fees). The Benchmark is being used by the Fund for performance comparison purposes only and the Fund does not intend to track it.

Performance commentary

The fund outperformed the index over the quarter (Z Acc USD). For US exposure, falling government bond yields were the main driver of absolute returns, aided by carry and tightening spreads, while euro and sterling investment grade returns were driven more by tightening spreads and attractive carry.

Stock selection effects were positive during the quarter, particularly within the banking sector, where subordinated bonds continue to perform well, led by the likes of Lloyds Banking Group, BBVA, HSBC and Santander. Exposure to structured bonds was also supportive, with Unifund was a notable example. These are secured bonds financing loans to two universities. The University of Sheffield repaid its loan at par during the quarter, resulting in strong performance from the bonds.

All issuers within our sustainable holdings offer a net benefit to society through either their products/services or their operations. As well as reducing risk, we seek out opportunities that are under-researched e.g., bonds that do not fall into mainstream indices or benchmarks and/or are unrated by ratings agencies. Importantly, the sustainable credit proposition provides access to critical sectors that most investors can't access via equity markets. Key themes in the funds include social housing, social & environmental infrastructure, community funding (regulated banks and building societies focused on SME and retail lending), financial inclusion & resilience (such as insurers offering products which protect individuals and businesses from unexpected events) and the energy transition. On sustainability grounds, we have no exposure to bonds of oil & gas companies or extractive industries. We are also underweight in the general industrial and consumer goods sectors, and to a lesser extent in consumer services.

Fund activity

We continued to invest in bonds that meet both our demanding financial and sustainable criteria, and which fit into the sustainable themes that we think will endure and offer long-term solutions to the challenges that the world faces. We also aim to construct the fund to ensure that it yields more than the benchmark index. We believe that this positioning will be beneficial in the medium term, given the valuation of credit markets and attractive opportunities we see.

The additional sustainable criteria we use mean that our portfolio will tend to have certain differences with the benchmark index. For instance, while it will have significant exposure to the banking sector, this is typically much lower in US banks than the index, reflecting the higher weighting of investment banks that typically do not score well on our criteria. In addition, the portfolio will usually have much lower exposure to China and India, where issuers may look attractive in financial terms, with many offering significant yield premia, but again do not score well on our criteria.

New issue markets were generally slow in July and August, reflecting the usual summer lull. The end of the summer saw a significant increase in activity, with September one of the busiest Septembers on record with over \$200 billion of corporate bonds issued in the US. That supply was met with robust demand.

Activity over the quarter was focused in two areas – new issues and relative value switches. Financials are a major part of credit indices and this was the focus for new issue activity, notably senior bonds which came to market at attractive credit spread premia to the market. Examples included US dollar issues from Nationwide, Standard Chartered, KBC and Santander, as well as euro-denominated issues from ABN Amro and Credit Agricole. In insurance, we added subordinated RT1 bonds from Chesnara, which came at a yield of 9%. To raise cash to participate in new orders, we generally took profits on short-dated bonds after strong performance, including Visa and Volksbank.

Other new issue activity including adding a euro new issue from UK mobile phone company Vodafone, US infrastructure technology leader Broadcom and US animal health company Zoetis. Finally, we added a sterling-denominated issue in the secondary market from International Distribution Services (better known as Royal Mail). This demonstrated the value of a global mandate, as a new euro issue from IDS came to market at unattractive levels, leaving the sterling equivalent looking cheap despite offering the same credit risk.

Switches are an efficient way to increase credit spread or reduce risk. During the quarter we sold 2028 bonds from US pharmaceutical company Abbvie, adding 2035 bonds from biopharmaceutical company Gilead Sciences. We also trimmed exposure to fintech provider FIS, adding Dutch semiconductor company NXP.

Maturity profile

Characteristics and climate

Sustainable investment rationale

The Fund focuses on the sustainability of the products and services of the companies it invests in, as well as their standards of environmental, social, governance ("ESG") management, alongside financial analysis. The investment approach is fundamentally based on positive screening; identifying companies that are making a positive contribution towards a cleaner, healthier, safer and more inclusive society, through assessing both what a company does and how it does it, and through active engagement to encourage continual improvement. The fund will not invest in companies that undertake business activities deemed to be detrimental to society and that breach our Do No Significant Harm principle. Further details of the Funds Sustainable Investment process can be found in the ethical and sustainable investment policy at

www.rlam.com/uk/individual-investors/policies-and-regulatory/

Fund exclusions

Exclusion criteria that make sure a fund does not invest into a specific service or product. Royal London Asset Management has a controversial weapons exclusion across all investments.

 Adult entertainment	✓	 High environmental impact	✓

 Animal welfare	✓	 Nuclear power	✓
 Armaments	✓	 Nuclear weapons	✓
 Fossil fuels	✓	 Tobacco	✓
 Gambling	✓	 UNGC / OECD violators	✓

Climate metrics

	Fund	Benchmark	Difference (%)
Financed emissions (tCO2e)	12,804	n/a	n/a
Financed emissions coverage	89.24%	n/a	n/a
Carbon footprint (tCO2e/\$M invested)	23.59	70.22	(66.40)
Carbon footprint coverage	89.24%	93.92%	(4.99)
Weighted average carbon intensity (tCO2e/\$M sales)	77.74	206.47	(62.35)
Weighted average carbon intensity coverage	95.66%	95.63%	0.04

All climate metrics presented above are for Scope 1-2 emissions. Unless specified in the objective, the data is for information only and should not be taken to mean they are being managed to/controlled.

Implied temperature rise

	Fund (%)	Benchmark (%)	Difference (%)
Implied temperature rise (ITR) coverage	87.27	92.72	(5.87)
% of portfolio below 2°C ITR	59.08	45.35	30.27
% of portfolio below 1.5°C ITR	33.07	18.07	82.99

SBTi net - zero

	Fund (%)	Benchmark (%)	Difference (%)
SBTi Net-Zero committed	14.07	12.86	9.37
SBTi Near-Term committed	9.50	3.48	173.25
SBTi Near-Term targets set	19.88	25.94	(23.34)

Fund Engagement

Engagement definition

Engagement is active dialogue with investee companies (or other entities). There are two types: engagement for information, which is dialogue as part of investment research or ongoing monitoring, without specific objectives for change, and engagement for change, which is purposeful dialogue to influence positive change, with defined objectives and demonstrable outcomes.

Engagements

Engagement activity	Fund 3 months	Fund 12 months
Number of entities engaged	14	43
Number of engagements	17	97

This is an estimate. Some engagements at the issuer level may not have been attributed to the specific bond held in the fund, resulting in a lower number of engagement activities.

Total engagements by theme and topic

Climate	3
Climate - Physical Risk	2
Climate - Transition Risk	1
Environment	2
Governance	9
Corporate Governance	7
Board	1
Remuneration	1
Social & Financial Inclusion	7
Just transition	6
Social & Financial inclusion	1

Technology, Innovation & Society	4
Cybersecurity	2
Technology & Society	2

Engagement focus

Firm-wide engagement activity is centred around six themes which we have identified in consultation with our clients. These are: climate change; nature and biodiversity; health; governance and corporate culture; social and financial inclusion; innovation, technology and society. Portfolio level engagements are not thematic and are focussed on issues specific to managing the portfolio and meeting the investment objective.

Engagement data represents all engagements undertaken at both firm and portfolio level across Royal London Asset Management, and may not be limited to those undertaken solely for the purpose of managing the fund.

The numbers of engagements and themes/topics discussed may differ where a single engagement covers multiple themes/topics.

Fund Engagement

Engagement outcomes

Bunzl Plc - Workplace culture

Purpose:

The purpose of the engagement meeting with Bunzl, a global distribution and outsourcing company, was to discuss the company's approach to workforce engagement, whistleblowing, and reporting on workplace conduct, as well as to explore opportunities for improving transparency and disclosures.

Outcome:

Bunzl has shown a strong commitment to workforce engagement, with directors leading listening sessions across regions and languages. Although its decentralised model creates challenges for centralised reporting, the company is open to improving disclosures and performance monitoring. Bunzl shared whistleblowing data, noting an increase in reports, particularly from recent acquisitions in Latin America, which the company suggests growing employee confidence in reporting mechanisms. Serious cases are escalated to the board, with outcomes ranging from dismissals to educational interventions. The company is strengthening local reporting, conducting annual self-assessments, and using employee surveys, including discrimination-specific questions, to monitor culture, with positive results observed.

We encouraged Bunzl to enhance the granularity of its Speak Up data, benchmark performance against industry standard, provided by Navex, a leading compliance and risk management platform, and showcase positive survey outcomes. The company is considering tracking substantiation rates for future board reporting. Next steps include delivering a more detailed breakdown of Speak Up data, exploring external benchmarking, and reporting substantiation rates by risk category.

Tesco Plc - Workplace culture

Purpose:

The purpose of this engagement with Tesco PLC, a multinational retailer, was to follow up on RLAM's workplace culture-related concerns, specifically around the transparency of misconduct reporting. The meeting aimed to understand the company's current approach, recent policy developments, and future plans for data collection and reporting, particularly in light of upcoming regulatory obligations.

Outcome:

Tesco acknowledged our concerns and confirmed that improving data collection systems is now a strategic priority. The company has introduced new policies and operational protocols covering bullying, harassment and third-party conduct, including customers and contractors. Legal changes around employer responsibility to prevent sexual harassment have prompted Tesco to strengthen its controls and training programmes. While there is no defined timeline for improved disclosures, the company is actively developing mechanisms to support effective reporting and expects greater clarity on timelines later this year.

Tesco confirmed that it will be subject to Corporate Sustainability Reporting Directive (CSRD) obligations by 2027 or 2028 and aims to have a comprehensive dataset in place by then. Current disclosures lack sufficient detail on reported cases of harassment, bullying, racism and other misconduct. The workplace relations team, responsible for policies, redundancies, store closures and union relations, has shaped the company's response to sexual harassment. New policies now cover third party conduct and customer interactions, with a 2024 anti-harassment training refresher planned. Tesco has developed a group wide sexual harassment blueprint and continues to run annual awareness campaigns. Risk assessments are under way to identify higher risk roles, and specialist support is being provided for line managers. The Protector Line whistleblowing service has seen more consistent reporting, attributed to increased awareness. RLAM reiterated its request for improved disclosures and offered to share best practice examples. Further engagement is planned to explore collaborative improvements in workplace culture transparency.

Market commentary

Market overview

Following a turbulent second quarter shaped by the initial shock of US trade tariff announcements, markets stabilised during the third quarter. Globally, attention shifted towards fiscal policy and government debt sustainability. With central banks circumspect about the prospects for further rate cuts, uncertainty around potential rate cuts influenced bond yields and investor confidence.

Risk assets generally performed well over the period. US markets navigated mixed signals. While second-quarter earnings generally exceeded subdued expectations, and business surveys reflected a sense of optimism, signs of a cooling labour market and renewed concerns over the Federal Reserve's independence added a layer of uncertainty during the period. The US dollar softened slightly, while equities—especially in the tech sector—remained buoyant, driven by ongoing enthusiasm for artificial intelligence despite growing concerns over near-term revenue potential.

A shadow was cast over the UK's economic outlook during the summer quarter. Inflation proved more persistent than expected, prompting the Bank of England to strike a more cautious tone—even as it proceeded with a rate cut in August. Expectations for further easing were dampened and resulted in upward pressure on gilt yields. There were mounting concerns over the government's fiscal health, leading to speculation about potential tax increases or further gilt issuance in the forthcoming autumn budget.

The eurozone also faced a mixed quarter. While robust activity data and strong earnings in select sectors offered encouragement, political uncertainty sparked volatility and weighed on market performance. This was perhaps most visible in France, where the resignation of Prime Minister Bayrou, after losing a confidence vote over plans to address debt levels, added to pressure on President Macron.

Government bond markets proved volatile over the summer. Benchmark 10-year gilt yields rose from 4.48% to end at 4.70%, but with sharp rallies in both early August and September. Meanwhile at 5.75%, UK 30-year gilt yields hit their highest levels in almost 30 years. In the US, 10-year treasury yields stood at 4.13% at the end of September, slightly lower than levels seen at the start of July but with considerable volatility in the interim. In the eurozone, the spread between 10-year bonds in France and Germany expanded to the widest level in more than a year as French bond yields climbed higher amid the country's debt crisis. The German 10-year bund yield was 2.67% at the end of the third quarter, broadly in line with previous months.

Global investment grade credit markets saw positive returns over the quarter. Tighter credit spreads and attractive yields supported returns, as did falling government bond yields in the US market. US investment grade saw the largest returns, ahead of both euro and sterling equivalents.

Outlook

There is no let-up in market uncertainty. Geopolitics are perhaps a bigger factor than at any time this century given the ongoing situation in Ukraine, wider Russian belligerence in Europe and the potential for spillover effects. At the same time, policy uncertainty has also not eased, with tariffs still very much on the US agenda, the current administration still announcing policies without details appearing to be complete and doing nothing to erase concerns about political interference in monetary policy. On top of these, budget concerns are also a significant factor in both the US and UK. Monetary policy settings are generally seen as supportive of fixed income markets, but even here, there is uncertainty around the timing and quantum of rate cuts as inflation is still not fully subdued. These factors help explain why government bond yields have been relatively volatile in 2025, and there seems little prospect of a material change in this in the next few months.

Yet risk markets generally, including global credit markets, have continue to produce attractive returns. With investment grade credit spreads having compressed in recent months, it is natural to look at absolute levels to determine whether the market still offers 'value'. With default rates low, and new issuance active, we continue to believe the all-in yield on global credit remains attractive. Furthermore, we continue to find attractive investment opportunities, partly through the new issue market but also by focusing on exploiting market inefficiencies. By focusing on bottom-up analysis, we continue to build overall portfolios that we believe offer attractive risk / return profiles with above-market yields.

While near-term absolute performance is likely to be heavily influenced by movements in the yields of underlying government bond markets, we believe that continued emphasis on diversification, as well as our focus on income, will continue to support returns as has been the case through the present environment of volatile yields.

Risks and Warnings

Investment risk

The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Credit risk

Should the issuer of a fixed income security become unable to make income or capital payments, or their rating is downgraded, the value of that investment will fall. Fixed income securities that have a lower credit rating can pay a higher level of income and have an increased risk of default.

EPM techniques risk

The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Exchange rate risk

Changes in currency exchange rates may affect the value of your investment.

Interest rate risk

Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital. Unlike the income from a single fixed interest security, the level of income (yield) from a fund is not fixed and may go up and down. Bond yields (and as a consequence bond prices) are determined by market perception as to the appropriate level of yields given the economic background.

Liquidity risk

In difficult market conditions the value of certain fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.

Emerging markets risk

Investing in Emerging Markets may provide the potential for greater rewards but carries greater risk due to the possibility of high volatility, low liquidity, currency fluctuations, the adverse effect of social, political and economic instability, weak supervisory structures and accounting standards.

Responsible investment risk

The Fund can only invest in holdings that demonstrate compliance with certain sustainable indicators or ESG characteristics. This reduces the number securities in which the Fund can invest and there may as a result be occasions where it forgoes more strongly performing investment opportunities, potentially underperforming non-sustainable funds.

Derivative risk

Derivatives are highly sensitive to changes in the value of the underlying asset which can increase both Fund losses and gains. The impact to the Fund can be greater where they are used in an extensive or complex manner, where the Fund could lose significantly more than the amount invested in derivatives.

Source: RLAM as at 30 September 2025. All figures are mid-price to mid-price for the Royal London Global Sustainable Credit Fund Z Acc USD share class. Since inception date 10 February 2021.

Glossary

Bonds

Securities that represent an obligation to repay a debt, with interest. Investment grade bonds are high quality bonds that are viewed as being highly likely to make all scheduled payments of interest and principal. Low quality bonds carry higher risk but also typically pay higher rates of interest. Corporate bonds are those issued by companies to raise finance.

Carbon footprint

Exposure to high emitters in the portfolio, expressed in tCO₂e/\$M invested. Financed emissions are divided by the portfolio value, the same approach for listed companies and private issuers is applied in this metric.

Currency hedged share classes

Currency Hedged Share Classes aim to provide investors with a return highly correlated to the return of the base currency share class by minimising the impact of exchange rate fluctuations between the base currency of the Fund and the investor's chosen currency.

Derivatives

A financial instrument whose price is dependent upon or derived from one or more underlying asset.

ESG Integration

The consideration of environmental, social and governance (ESG) risk as part of the investment process. ESG integration does not mean the fund is trying to achieve a particular positive ESG outcome. Please check prospectus documentation for details on specific fund-level objectives.

ESG Integration

The consideration of environmental, social and governance (ESG) risk as part of the investment process. ESG integration does not mean the fund is trying to achieve a particular positive ESG outcome. Please check prospectus documentation for details on specific fund-level objectives.

Efficient Portfolio Management (EPM) techniques

The Fund may engage in EPM techniques including holdings of derivative instruments. The use of these instruments may expose the Fund to volatile investment returns and increase the volatility of the net asset value of the Fund. EPM techniques may involve the Fund entering into transactions with counterparties where there may be a risk of counterparty default. The Fund's ability to use EPM strategies may be limited by market conditions, regulatory limits and tax considerations.

Environmental, social and governance

A list of predefined criteria that determines how a company operates in terms of sustainability and overall corporate governance.

Exclusions

Explicitly prohibits investing in a particular company, sector, business activity, country or region.

Financed emissions

The emissions from activities in the real economy that are financed through lending and investment portfolios, expressed in tCO₂e. Emissions are attributed to a portfolio based on the portion of the company's value the portfolio holds, and using different accounting values for public and private corporates. We provide financed emissions for scope 1 and 2 emissions.

Fund restrictions definitions

Alcohol: Companies which have involvement in brewing, distillation or sale of alcoholic drinks.

Animal Welfare: Companies that conduct animal testing (other than for purposes of human or animal health and/or where it is required by law or regulation).

Adult Entertainment: Companies which own or produce adult entertainment services, or engage in the distribution or sale of adult entertainment services.

Armaments: Companies who manufacture armaments or nuclear weapons or associated products.

Controversial Weapons: Weapons which have an indiscriminate and disproportional impact on civilians or weapons that are illegal and prohibited by international conventions and treaties.

Fossil Fuels: Companies involved in the exploration, extraction or refining of oil, or gas, or coal, plus any activity relating to thermal coal.

Gambling: Companies who promote irresponsible gambling which includes betting shops, casinos or amusement arcades.

High Environmental Impact: Companies which have a high environmental impact, and which have 'no evidence' of appropriate environmental management systems.

Human Rights Risks: Companies with a strategic presence operating in countries of concern and which have 'no evidence' of policies or systems to manage human rights risks.

Nuclear Power: Companies who generate energy from Nuclear Power.

Nuclear Weapons: Companies that manufacture, nuclear; or are involved in the production of intended-use parts, whole weapons systems, or exclusive delivery platforms.

Glossary

Fund restrictions definitions

Tobacco: Companies which are growing, processing or selling tobacco products.

Gross redemption yield

Gross redemption yield is the rate of discount at which a bond's future obligations of interest and capital payments equates to its current price. The gross redemption yield shown for the fund is the average for its individual holdings, weighted by their current value, gross of relevant fund management costs and gross of tax.

Implied temperature rise (ITR)

ITR aims to measure the global warming outcome from the emissions trajectory of a company, if the whole economy followed the same trajectory.

Number of holdings

Total number of unique holdings of the Fund excluding cash, currency and derivatives.

Number of issuers

Number of unique issuers of all assets held by the Fund, excluding cash, currency and derivatives.

Performance

Both the Fund and Index performance are based on close of business prices.

Pricing

The Fund's price may swing to bid or offer to protect existing investors from the costs associated with buying or selling the fund's underlying assets when other investors are entering or leaving the fund. Performance is based on this pricing.

Promotes environmental or social factors

An ESG Fund promotes, among other characteristics, environmental or social characteristics, or a combination of those characteristics, provided that the companies in which the investments are made follow good governance practices.

SBTi

The Science-Based Targets initiative is a consortium of organisations that set up the definition and promotion of science-based target setting.

Sustainable fund objective

A product that has sustainable investment or a reduction in carbon emissions as its objective.

Top 10 holdings

Top 10 assets held by market value, excluding derivatives and cash.

Weighted Average Carbon Intensity (WACI)

In line with our bespoke and targeted approach to credit analysis, we have developed an in-house carbon data tool that addresses coverage and mapping issues with third party systems. The development of this tool has been a critical element of RLAM's ESG integration into our credit process, addressing coverage and mapping issues with third party systems. This enhanced coverage is reflected in the WACI figures provided in this report, with all other metrics instead being based on data from MSCI.

Weighted Average Carbon Intensity (WACI)

Portfolio's exposure to carbon-intensive companies, expressed in tCO₂e / \$M revenue. Scope 1 and scope 2 GHG emissions are divided by companies revenues, then multiplied based on portfolio weights (the current value of the investment relative to the current portfolio value). The WACI is calculated as a weighted average sum of the holdings with carbon intensity coverage.
