The fund

Fund performance objective and benchmark

The Fund aims to provide a return greater than that of the FTSE® Small Cap ex-IT (Investment Trusts) Total Return GBP Index over rolling 5-year periods, through capital growth, after the deduction of charges. The Index has been selected as a target benchmark because it is representative of the type of companies in which the Fund invests, and it is therefore an appropriate measure for the Fund's performance. Management of the Fund is not restricted by this target benchmark and the Fund does not base its investment process upon the Index. As a result, the Fund can invest in companies that are not part of the Index. A performance comparator for the Fund is the IA UK Smaller Companies sector (the "IA Sector").

Performance commentary

During the first quarter of 2026, the fund underperformed the FTSE Small Cap ex Investment Trusts Index.

Positive contributors to performance included Serica Energy, Cohort and Gooch & Housego. Serica Energy performed well, supported by higher oil prices and speculation that the UK Treasury was considering the removal of the windfall tax on North Sea oil and gas producers. The company also reported results and production guidance that were in line with expectations. Cohort's shares rebounded following a sell-off in December, as a number of contract wins helped underpin revenue expectations for this current financial year as well as outer years. Gooch & Housego also contributed positively, with a trading update highlighting strong order momentum and improving end-market conditions. Capita, which was not held, contributed to relative performance as its shares weakened following full-year guidance that fell short of expectations, reflecting continued losses in its Contact Centre division and higher mobilisation costs.

EnQuest, which is not held, detracted from relative performance as its shares benefited from similar dynamics to Serica Energy. The company also announced a transaction to settle all future contingent consideration relating to one of its oilfields, alongside a solid production update. A number of the fund's off-benchmark software holdings, including Alfa Financial Software and Craneware, were sizeable detractors over the period amid investor concerns regarding the potential for AI to disrupt their business models.

Performance and activity

Fund activity

While the fund continues to invest in a broad range of smaller companies from a diversified range of industry sectors, over the quarter a wide range of holdings were trimmed to provide cash to meet outflows from the fund.

Fund breakdown

Sector weights

Fund Engagement

Engagement definition

Engagement is active dialogue with investee companies (or other entities). There are two types: engagement for information, which is dialogue as part of investment research or ongoing monitoring, without specific objectives for change, and engagement for change, which is purposeful dialogue to influence positive change, with defined objectives and demonstrable outcomes.

Engagements

Engagement activity	Fund 3 months	Fund 12 months
Number of entities engaged	7	39
Number of engagements	8	48

This is an estimate. Some engagements at the issuer level may not have been attributed to the specific bond held in the fund, resulting in a lower number of engagement activities.

Total engagements by theme and topic

Governance	9
Corporate Governance	7
Remuneration	2

Engagement focus

Firm-wide engagement activity is centred around six themes which we have identified in consultation with our clients. These are: climate change; nature and biodiversity; health; governance and corporate culture; social and financial inclusion; innovation, technology and society. Portfolio level engagements are not thematic and are focussed on issues specific to managing the portfolio and meeting the investment objective.

Engagement data represents all engagements undertaken at both firm and portfolio level across Royal London Asset Management, and may not be limited to those undertaken solely for the purpose of managing the fund.

The numbers of engagements and themes/topics discussed may differ where a single engagement covers multiple themes/topics.

Fund Voting

Voting category breakdown

Notable votes

Chemring Group Plc

Remuneration Report - against:

We voted against as, despite engagement and context provided, we would prefer greater stretch in LTIP targets-particularly threshold set above external forecasts and maximum outcomes more stretching than brokers' expectations.

Authority to Issue Shares w/o Preemptive Rights - against:

We voted against due to concerns regarding potential dilution, particularly when considering the combined non-pre-emptive issuance authorities.

Authority to Issue Shares w/o Preemptive Rights (Specified Capital Investment) - against:

We voted against for the same reason, given dilution risk from the combined authorities.

Diploma Plc

Authority to Issue Shares w/o Preemptive Rights - against:

We voted against due to concerns regarding potential dilution, particularly when considered alongside related issuance authorities.

Authority to Issue Shares w/o Preemptive Rights (Specified Capital Investment) - against:

We voted against for the same reason, reflecting cumulative dilution risk.

Fund Voting

Notable votes

ME Group International Plc

Waiver of Mandatory Takeover Requirement - against:

We voted against the waiver due to concerns over the potential for creeping control by the founding shareholder and the associated entrenchment risks.

Renew Holdings Plc

Authority to Issue Shares w/o Preemptive Rights - against:

We voted against due to concerns regarding potential dilution, particularly when considered alongside related issuance authorities.

Authority to Issue Shares w/o Preemptive Rights (Specified Capital Investment) - against:

We voted against for the same reason, reflecting cumulative dilution risk.

Market commentary

Market review

Investors have had to contend with significant bouts of volatility in the first quarter of 2026 ranging from US policy risks, the flare up of geopolitical events, and growing fears around AI adoption as a force for disruption. Policy shocks from the US administration – specifically trade tariffs, questions around fiscal sustainability and interventions in Federal Reserve independence – prompted a rotation away from US dollar assets at the start of the year. Commodity prices, most notably precious metals, rallied strongly as a hedge against a weaker dollar and geopolitical tensions, providing a boon to the mining sector.

Having started the year strongly against this backdrop, UK equities came under pressure later in the quarter following the outbreak of war in the Middle East, with direct US intervention being met with escalation from Iran. Oil and gas prices surged following attacks on key infrastructure assets, in addition to the effective closure of the Strait of Hormuz that will further restrict the flow of supply from the region. This raised market concerns about renewed inflationary pressures, scuppering previous expectations of interest rate cuts and driving bond yields higher.

Alongside these macro currents, investors have become increasingly concerned with AI disruption risks for a wide range of sectors, prompting share price weakness among technology companies in the UK. While developments are fast-evolving, investor fears broadly amount to the extent to which future value will accrue to owners of data or whether they will lose out to competing AI platforms. High profile product launches, most notably from Anthropic, triggered declines across software, data and information services, and even extended in professional services such as insurance and wealth management.

Against the backdrop of war, energy stocks dominated market returns over the quarter while consumer facing sectors came under pressure as households face yet another inflationary shock in 2026. In a market also seeking refuge from AI disruption risk, market rotation towards capital-intensive industries with tangible asset backing was evident, with sectors such as energy, materials, utilities and telecoms outperforming.

Outlook

Looking forward, there is a high degree of uncertainty around the conflict in the Middle East with a wide range of potential outcomes. While markets have gone some way to pricing in the risks to global growth and inflation, it is still the expectation that there will be some form of de-escalation and resolution in the coming weeks as opposed to a long, protracted conflict in the region, which is not in the interests of the key actors. The challenge for investors is that the market implications from either scenario are likely to vary significantly and with the outlook uncertain, broad diversification against inflation and growth risks need to be considered. That said, even if there was a resolution tomorrow there is a new reality that investors and companies will have to adapt to. It arguably further reinforces the market environment we have experienced following the pandemic and the war in Ukraine – one that reflects a more inflationary world and with the benefits of a 'peace dividend' and globalisation firmly behind us.

In the UK the domestic outlook is increasingly gloomy with households and businesses facing renewed inflationary pressures and interest rate cuts from the Bank of England. In fact, market expectations point to two interest rate hikes this year. This could well be an overly cautious view exhibited by the bond market, as interest rate rises will do little to ease pressures from what is an external supply shock. Demand conditions are also generally more subdued and labour markets less tight than in the period following the pandemic. However, market expectations themselves will likely act as a brake on growth as credit costs work their way through the economy. As we often highlight, it is worth noting that the fortunes of the UK equity market are not closely tied to the economy, such is its international make up. That said, significant share price underperformance from domestically sensitive parts of the market suggests, in our view, that recessionary risks are somewhat priced in. While the timing of recovery is not possible to predict, any ceasefire of the conflict in Iran could see a very strong rebound in a number of sectors and companies that have been punished over the last quarter. Offsetting some of these headwinds are the factors that buoyed the UK in 2025 – high levels of mergers and acquisitions amid a market with a well-diversified sector mix and attractive valuations.

Risks and Warnings

Investment risk

The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

EPM techniques risk

The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Liquidity risk

In difficult market conditions the value of certain fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.

Counterparty risk

The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Smaller companies risk

The Fund invests in smaller companies, the prices for which can be less liquid and be more volatile than those of larger companies and therefore may have a greater impact on the value of the Fund.

Glossary

Efficient Portfolio Management (EPM) techniques

The Fund may engage in EPM techniques including holdings of derivative instruments. The use of these instruments may expose the Fund to volatile investment returns and increase the volatility of the net asset value of the Fund. EPM techniques may involve the Fund entering into transactions with counterparties where there may be a risk of counterparty default. The Fund's ability to use EPM strategies may be limited by market conditions, regulatory limits and tax considerations.

Number of holdings

Total number of unique holdings of the Fund excluding cash, currency and derivatives.

Performance

The Fund price is taken at mid-day using swing prices where applicable, while the index performance is priced at close of business. Significant intra-day market movements at the start or end of the day may therefore distort comparisons.

Pricing

The Fund's price may swing to bid or offer to protect existing investors from the costs associated with buying or selling the fund's underlying assets when other investors are entering or leaving the fund. Performance is based on this pricing.

Rolling 5-Year Period

A rolling 5-year period is any period of five years, no matter which day you start on.

Sector weights

Breakdown of holdings by FTSE ICB (Industry Classification Benchmark) sector relative to the benchmark index.

Top 10 holdings

Top 10 assets held by market value, excluding derivatives and cash.
